As for the gameplay itself, in FIFA 22: Players can now be more decisive in their movement on the pitch by intercepting the ball quicker. Players on both team starts closing in on the ball immediately after it is fed into the wide area. As a result, players who are already on the other side of the pitch will have to try to create space for themselves through a switch of position and speed. FIFA 22 introduces 'Take on Control,' which allows players to take control of the ball early, and use all of their abilities to win a penalty kick or create an opportunity for a good scoring chance. Take on Control makes penalty kicks more challenging and gives goalkeepers a sense of control on the ball. Plus, penalties can now be saved with headers, crosses, and throws-in. Online Features Matchmaking improvements allow for the creation of more personalized games that closely match the players' characteristics. Players can now also see improved matchmaking icons on their main matchmaking screen. Additionally, the PlayStation®4 and Xbox One online standards will be available on all platforms. A new, "My Club" system provides support for individual clubs, as well as for the 32 national teams. Players can now play for the club of their choice, create a new club and follow it, chat with players representing their club, and view the final standings on their club's page. The My Club system will display the player's ranking among players that are from the same club, as well as that of their teammates. Clubs will also have a new vehicle overview screen, as well as a "Best of X" section for players to show off their stats. To celebrate the official launch of FIFA 22, there will be a free live special stream featuring the English Premier League as well as tournaments taking place in Dubai, Marrakech and New York. ## **What's new in Fifa 22:**

- **Team Line-Ups are back!** Jump straight into a new page in the Team Management screen to add and manage your whole squad at once, making creating and managing team lineups even easier.
- **New attacking attributes:** - **Passes:** These stats show how clean your passes and crosses are, whether they are difficult or not, the work-rate you put into each pass, which direction the ball is going and how difficult it is to control.
- **Impact:** Deflecting the ball or bouncing it off your defender is no longer common in the game, so this new number will show how much of a difference your contribution made to the attack.
- **Off-Ball Actions:** Player movement while the ball isn't in play will now result in missing shots, and balls played forwards but not connected to a player will be 'spiralled out' towards the direction of the last player to connect with the ball. This gives players more of a choice, and more fun, when recovering the ball.
- **New Creator ability for players:** Design the look of your new club in Career Mode. Before taking your club on a journey through the ranks, try out the 'Club Creator' to give your club its identity and rival other clubs.
- **Updated Generator kit system** - Now you've got more options to play differently on the field, you can create custom kits from existing kits from FIFA 19. With each kit in the game, you'll find individual parts and pieces you can combine together to create unique template pieces that you can then apply to your own tailor-made kits.
- **Dynamic Goalkeeper** - Gain a gauge of your player's threat to the ball where you can use its location to choose the type of goalkeeping strategy you want to implement. Guarantee an out-of-this-world save in high-pressure moments with Deeper Kicking, and have the ball fall towards the bottom of the goal at the perfect moment with
