It offers a huge variety of tools and support for nearly any need you can imagine, so it's a very powerful tool that's very versatile. # A NOTE ABOUT THE ESSENTIALS TOOL SET Before you dive into Photoshop, make sure you have a copy of the following: * **Adobe Photoshop:** For the most part, the Photoshop interface shown in Figure 1-1 is the same whether you're using it on the Mac or Windows. However, as of this writing, the Mac software is only available for the Adobe Creative Cloud, whereas the Windows version is only available as a desktop app. * **Adobe Bridge:** This document management system enables you to track multiple files in a project. It's a great way to keep track of files in Photoshop and allows you to share those files with others in your organization. * **Adobe Camera Raw:** Adobe Camera Raw is the preferred raw image conversion filter in Photoshop. It can convert raw files into a TIFF or JPEG format. It enables you to edit the raw file data. With Camera Raw, you can easily apply exposure adjustments, color corrections, and more in the tool. * **Adobe DNG Converter:** For most users, DNG Converter is not installed by default on a Windows machine, which can be frustrating. After you install it, you can convert your camera's DNG file into a TIFF, JPG, or Photoshop EPS file, which enables you to share your images easily. Although the essentials tool set is an important aspect of Photoshop, the software itself is capable of so much more than what you see here. The designer might simply create a logo from scratch, or the photographer might use Photoshop to create custom pieces or work on existing photographs. All designers and photographers use Photoshop at some point during the course of a project, for some basic functions. The controversial security firm, which has been linked to deaths in Iraq, Afghanistan and the US, is now under new corporate ownership and renamed itself Xe. Its UK unit then changed its name from Aegis Holdings Ltd to Blackwater Ltd after the US gun company changed its corporate name. But the Foreign Office and the Metropolitan Police insisted the company - infamous for using deadly force - would not be able to carry out its 'business' in the UK. Documents show the firm's name was changed from Blackwater Ltd – after the firm's now-former parent company, Blackwater USA – to Aegis Holdings Ltd, where both dates and names are identical. At the same time, the company's new UK website was registered with the registrar's office and the company was notified of new rules surrounding controversial security firms operating in the UK. According to the newly released documents, this allowed the firm to change its name from Aegis Holdings Ltd to Aegis Ltd – after the firm's new parent company, Aegis Defence Services, Inc. (Image: Rex Features) (Image: Getty) Mr Osborne, who was then Chancellor, branded the company's name and logo 'offensive' after a three-year investigation. Today a Whitehall source told the Press Association: "The name-change is an administrative thing. "You do that when you change a company's name – such as when they have their own subsidiary over here. "Aegis Ltd had to be notified that they would be carrying out security and detention work and providing guards." A Foreign Office spokesman said: "Blackwater employs British guards and fits the UK's rigorous licensing requirements and monitoring system. "The company will not be able to carry out this business in the UK." An MPS spokesman added: "This report is based on publicly available information. Once an investigation is in its later stages it is generally not possible to comment publicly on matters under investigation. This is all the more true when it concerns investigations into allegations of serious crime
